

Transportation Management Supply Chain Monitor Course

Course Synopsis

The TMS Supply Chain Monitor (SCM) course provides an in-depth learning opportunity in the setup and use of SCM within the TMS. Students will receive instruction in both administrative set up of the mandatory and optional components of SCM. They will be introduced to the concept of SCM and will learn how this tool can be used to improve supply chain efficiencies by setting up milestones and checkpoints during the order to cash process. Students will be shown how the TMS can proactively communicate possible supply chain failures. Specific topics in the 1/2 day course are listed below. This is a live instructor-led, web-based training.

Who Should Attend?

This course is designed for those users who are assigned the role of setting up, maintaining and monitoring SCM in the TMS. System administrators in the TMS would also benefit from this course to learn the setup variations for the components of SCM and to help in modifying them to meet the shipper's business requirements. Shipper planners would also benefit from this course by developing an understanding of the SCM notifications of pending failures which can be communicated via network advisors, the SCM console, and the load report timeline.

Prerequisites

We strongly recommend that students attend the TMS Fundamentals foundation course prior to taking this course, or have at least one year of broad user experience within the TMS application.

Learning Objectives

After attending this class, students should be able to:

- Understand how SCM is used to improve shipper and carrier supply chain performance.
- Explain the benefits of using SCM.
- Set up network advisors to support SCM.
- Set up both easy and customized load milestone profiles.
- Configure the SCM console to meet individual user's needs.
- Interpret the information provided in the timeline section of the shipper load report.

Course Agenda

- Introduction to Supply Chain Monitor (SCM)
- Network advisor setup
- Foundation data
- SCM administration setup
- Load milestone profile – easy & customized
- SCM console
- Carrier console template
- Load report timeline
- SCM scenarios

Cost

\$500 (due at registration)

What to Expect

- After enrollment, students will receive a link to the web meeting for the training. It is recommended that students save this meeting notice in their calendar with a reminder. A phone number for the associated conference call will be provided when the student logs in at the beginning of the course.
- Students will receive a soft copy of the slide presentation from the course and a set of self-guided exercises that can be performed after the course in a test environment.
